

# Radio systems UKW (41 MHz)

Radio systems of the the UKW series send and receive on frequency 41 MHz. UKW hand transmitters can be individually programmed by a coding bar which holds up to 1024 different programming codes. The encoding can be changed at any time and therefore provides reliable safety. Apart from the hand transmitters we offer different UKW radio receivers, completing our UKW radio systems product portfolio.

## 1. Hand transmitter UKW

- ✓ programming by code bar with up to 1024 different codes
- ✓ ideal for handcraft and industry due to large buttons
