

## Radio systems UHF (433 MHz)

Radio systems of the UHF series send and receive safely and without interference on frequency 433 MHz that has proved itself for years in the automobile industry. The powerful signal transfer of the 2-channel or 4-channel hand transmitters MAX, MIX and MHS is based on the modern KeeLoq system with automatic signal encryption. With each actuation a new code is generated. We additionally offer 1-channel and 4-channel Multibit transmitters, which are encoded with a DIPswitch. One highlight of our product portfolio is the MultiKee hand transmitter featuring not only KeeLoq but also Multibit. This transmitter is ideal for multiple garages having a public entrance door and single individual garage doors inside. Apart from our hand transmitters, we offer a wide variety of UHF radio receivers and actuators leaving nothing to be desired with regards to convenience and quality.

### 1. Design hand transmitter MAX and MIX

- ✓ high-quality design and powerful technology
- ✓ KeeLoq system with automatic signal encryption
- ✓ covering wide transfer ranges even under difficult circumstances
- ✓ accidental actuation of the transmitter is nearly impossible
- ✓ individual fastening with handy wall brackets

2-channel design hand transmitter MAX 43-2, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020223-31-3-32

4-channel design hand transmitter MAX 43-4, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020226-31-3-32

2-channel design micro hand transmitter MIX 43-2, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020228-31-3-32

### Wall brackets for MAX and MIX

With the handy and universal MAX and MIX wall brackets you can easily fasten the hand transmitters on the garage wall. The bracket's scope of delivery also includes a clip for the sunshade in your car for your convenience.

Wall bracket for transmitters MAX 43-2 and MAX 43-4 including clip for sunshade

**Article Number:**

020229-31-3-32

Wall bracket for transmitter MIX 43-2 with clip for sunshade

**Article Number:**

020250-31-3-32

## 2. Hand transmitter MHS

- ✓ high-quality and powerful technology
- ✓ KeeLoq system with automatic signal encryption
- ✓ covering wide transfer ranges even under difficult circumstances

2-channel hand transmitter MHS 43-2, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020112-31-3-32

4-channel hand transmitter MHS 43-4, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020113-31-3-32

7-channel hand transmitter MHS 43-7, KeeLoq, 433 MHz with KeeLoq hopping code

**Article Number:**

020188-31-3-32

## 3. Hand transmitter Multibit

- ✓ high-quality and powerful technology
- ✓ Multibit code system with DIP switches
- ✓ ideal for underground car parks and multiple garages

1-channel hand transmitter Multibit, 433 MHz with Multibit code

**Article Number:**

020001-31-3-32

4-channel hand transmitter Multibit, 433 MHz with Multibit code

**Article Number:**

020002-31-3-32

## 4. MultiKee combination hand transmitter

- ✓ combination KeeLoq and Multibit system
- ✓ high level of safety for private doors inside of multiple garages
- ✓ no limitation of programmable transmitters with Multibit
- ✓ individual safety with KeeLoq and nonetheless competitive in price

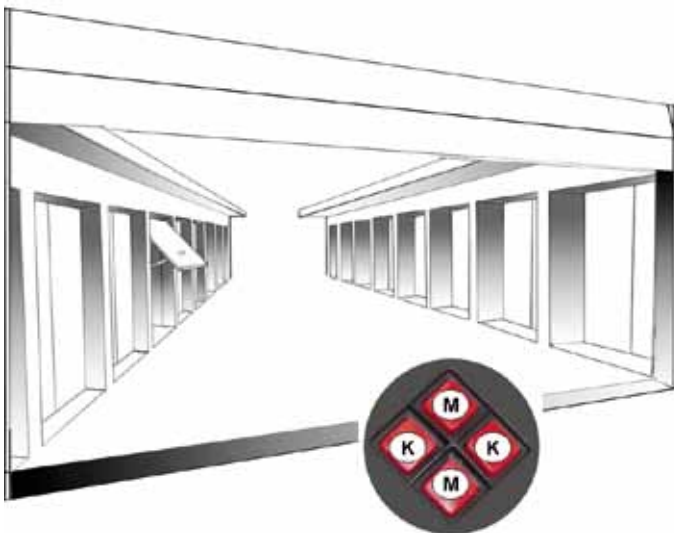

04

4-channel hand transmitter MultiKee

**Article Number:**

020254-31-3-32

The MultiKee transmitter has two Multibit and two KeeLoq buttons. The Multibit buttons with DIP switch encoding are ideal for opening and closing the public entrance door. Your private garage door inside the multiple garages is controlled and protected efficiently with the KeeLoq hopping code system.

K = KeeLoq / M = Multibit

## 5. Code touch contact DigiCode (external)

- ✓ high-quality design and powerful technology
- ✓ KeeLoq system with automatic signal encryption
- ✓ available with metal or foil keyboard
- ✓ up to 11 transmission codes programmable
- ✓ preservation of entire data during battery exchange

Code touch contact DigiCode Premium, KeeLoq, 433 MHz with KeeLoq hopping code, metal keyboard, 74 x 85 x 18 mm ( W x H x D)

**Article Number:**

148710-01-1-50

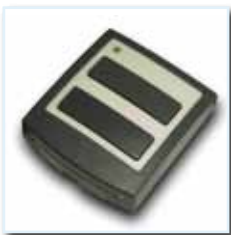

Code touch contact DigiCode Professional, KeeLoq, 433 MHz with KeeLoq hopping code, foil keyboard, 74 x 85 x 18 mm (W x H x D)

**Article Number:**

148700-01-1-50

## 6. Further actuators

Code touch contact DuoCode (internal), KeeLoq, 433 MHz with KeeLoq hopping code, 4-min-light control, combinable with hand transmitters UHF KeeLoq, 74 x 85 x 18 mm (W x H x D)

**Article Number:**

148740-02-1-50

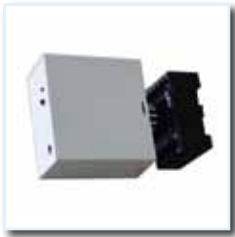

Radio key contact KeeCode, KeeLoq, 433 MHz with KeeLoq hopping code, for 1 signal, compatible with all receivers of the E-43 series KeeLoq, AP / UP

**Article Number:**

020134-31-3-32

## 7. Radio receiver UHF

Receiver E-43-B in pluggable casing, for KeeLoq and Multibit, connection voltage 24 V AC / DC with one relay output, recording of up to 60 different codes

**Article Number:**

020043-31-3-32

Receiver E-43-L pluggable, for KeeLoq and Multibit, one transistor output for e. g. sliding gate operators STA 270 / 280, recording of up to 60 different codes

**Article Number:**

020045-31-3-32

Receiver E-43-A, pluggable, for KeeLoq and Multibit, suitable for control unit hinged gate operators DTS T1 E and control unit sliding gate operators STS T2 E, recording of up to 60 different codes

**Article Number:**

020159-31-3-32
